सुरक्षा से समृद्धि - Prosperity through Security

Security Engineers Private Limited

Empowering Safety, Enabling Prosperity

Founded in **1984**, **Security Engineers Pvt. Ltd.** is one of India's most trusted names in security and facility solutions. What began as a vision of a group of dynamic engineers has grown into a multi-vertical enterprise delivering high-performance services across **Electronic Security, Integrated Automation, Cash Logistics, and On-Ground Guarding & Facility Management.**

With an unwavering focus on **technology, trust, and transformation**, Security Engineers continues to serve critical sectors including **BFSI, Government, Oil & Gas, Smart Infrastructure, and Industrial Enterprises.**

We are proudly **ISO 9001:2015 certified**, with a **Pan-India presence**, delivering consistent quality, innovation, and reliability through our skilled workforce and advanced systems.

Across India

Pan-India
Presence

“ Security is not just a service—it's a commitment to the future we aim to protect. ”

At Security Engineers, we believe security is the foundation for growth. Our goal is to safeguard what matters most. This allows our clients, communities, and country can move forward with confidence.

Our Mission

We are committed to delivering smart, sustainable, and secure solutions that redefine the standards of safety and service.

“बनो बनाओ उत्कृष्ट - Strive for Excellence, Inspire Excellence”

Innovation Leadership

Continuously adopt and integrate the latest technologies—AI, IoT, Cloud—to stay ahead of evolving security needs.

Customer Fulfillment

Understand, anticipate, and exceed client expectations through precision-engineered systems and unmatched service quality.

Partnership & Empowerment

Strengthen every link in our value chain—be it with vendors or our internal teams—by fostering collaboration, upskilling, and shared success.

What Drives Us?

A passion for technological excellence

A culture of integrity and responsiveness

A belief in inclusive growth through protection

Our Vision

To create a legacy of shared prosperity by securing lives, assets, and environments—fueling success for our clients, our people, our partners, and our nation.

We envision a future where security empowers progress, and every relationship we build contributes to a more resilient, prosperous, and protected society.

“बनो बनाओ समृद्धिशाली - Be Prosperous, Build Prosperity”

Suraksha Smart

Smart Infrastructure. Safer Environments.
Seamless Control.

At Security Engineers, our Suraksha Smart Division delivers smart infrastructure solutions for mission-critical environments. With over four decades of experience, we specialize in ELV systems, life safety, and integrated building automation across India and beyond. We focus on reliable, future-ready technologies designed to ensure safety and operational efficiency.

Our solutions empower clients across financial, energy, healthcare, manufacturing, and government sectors.

Comprehensive Solution Delivery

Security Engineers delivers holistic automation projects with precision and accountability, encompassing

CCTV Surveillance Systems

From traditional analog to advanced IP-based networks, we offer scalable surveillance setups for continuous visual monitoring. These systems support central recording, remote access, and can be upgraded with analytics for smart detection

Intrusion Alarm Systems

Our intrusion systems act as the first line of defense—instantly detecting unauthorized access through motion sensors, vibration detectors, and perimeter devices. Integrated alerts ensure timely action before incidents escalate

Fire Detection & Alarm

We deploy both conventional and addressable fire alarm solutions, tailored to site complexity and risk profile. Early detection through multi-sensor technology enables rapid response and safe evacuation

Public Address & Talkback

Clear communication is critical in large facilities. Our public address systems support emergency alerts and day-to-day announcements, while talkback stations enable real-time, two-way interaction across zones.

Nurse Call Systems

Essential for healthcare and assisted living facilities, our nurse call systems enable patients to alert medical staff instantly. With options for wired and wireless configurations, they ensure timely response, improved patient care, and workflow efficiency

Access Control Systems

We provide secure access solutions using biometric, facial recognition, and RFID technologies. These systems control entry to restricted areas while enabling attendance tracking and detailed audit trails.

Metal Detectors

Our doorframe and handheld metal detectors offer quick, reliable screening at high-security checkpoints. Ideal for sensitive zones, they ensure non-intrusive yet effective threat detection.

Baggage Scanning Systems

Equipped with high-resolution X-ray imaging, our scanners detect concealed weapons, explosives, and prohibited items. These are essential for high-footfall facilities like transport terminals and government complexes.

Gate Automation Systems

We offer automated entry solutions such as turnstiles, flap barriers, and bollards that streamline movement and enhance physical access control. These systems integrate effortlessly with surveillance and credential management tools.

Fire Suppression & Hydrant

Our offerings range from portable extinguishers and hydrants to advanced gas-based suppression units. These systems are designed to control fires at the source, minimizing damage and ensuring personnel safety

Suraksha Kavach

Human Vigilance, Technological Precision,
Uncompromising Protection

Suraksha Kavach, the manned guarding and facility services division of Security Engineers, stands as a pillar of physical security excellence across India's most vital industrial, commercial, and public sector environments. With a robust network of trained personnel, responsive teams, and digitally enabled supervision systems, Suraksha Kavach provides round-the-clock safety, emergency preparedness, and operational support tailored to meet the unique needs of each client site.

Manned Guarding Services

We deploy PSARA-compliant security personnel for 24/7 guarding of critical sites. From static posts and perimeter patrols to gate supervision and visitor control, our trained teams ensure controlled access, swift incident response, and rigorous reporting protocols

Facility Management

Combining housekeeping, routine maintenance, and infrastructure upkeep, this integrated team ensures operational continuity. Tasks include cleaning, waste management, minor electrical/mechanical maintenance, and HVAC support—creating safe, hygienic, and efficient work environments.

Fire Safety & Emergency

Our on-site fire teams specialize in industrial and high-risk environments, delivering preventive drills, real-time incident commands, and coordinated evacuation. With fire equipment management and rapid response capabilities, we maintain compliance and readiness at all times

Building Automation

Dedicated BMS operators stationed at central control centers manage and monitor building-wide systems—including CCTV, access control, fire detection, HVAC, and lighting. They perform live health checks, alarm triage, preventative troubleshooting, and coordination with field technicians and regulatory compliance teams.

Solutions include

Security Guard Deployment Industrial Fireman Services

Integrated Facility Management

Fire Drills & Emergency Response

Electronic Guard Patrol & Incident Logging

Suraksha Fleet

The Suraksha Fleet division ensures the safe and timely transportation of cash and valuables for leading banks and financial institutions. With GPS-enabled vehicles, trained security personnel, and advanced route optimization systems, Suraksha Fleet delivers trust on wheels.

Solutions include

Cash-in-Transit Van Operations

ATM Cash Replenishment

Real-Time Panic Integration

Real-Time Vehicle Tracking

Suraksha Vigil

Vigil is the dedicated E-Surveillance and Command Control division of Security Engineers, offering intelligent, 24/7 remote monitoring powered by AI and advanced analytics. Designed for banks, smart cities, government bodies, and industrial zones, Vigil transforms security into real-time, data-driven decision-making centers.

Solutions include

Remote Video Surveillance (RVS)

AI/ML-Based Video Analytics

CCTV Health Monitoring

Central Monitoring Station (CMS) Setup

Command & Control Room Design

SOP & Workflow Management for Incident Response

Why Choose Security Engineers?

Where Innovation Meets Integrity in Security

In an industry where trust, precision, and responsiveness matter most — Security Engineers

stands tall as a legacy-driven, future-ready partner. Our unmatched expertise across electronic, physical &

cash security ensures that every project we touch becomes a benchmark of safety & service excellence

Serving India since **1984** with unwavering commitment, across public and private sectors.

Legacy of Trust

40+ years of industry leadership across critical sectors

All-in-One Partner

Electronic security, fire safety, & cash logistics all under one roof

Certified & Compliant

ISO 9001:2015 certified. Fully compliant with IS, BIS, NFPA, NBC, PSARA & RBI

Tech-Enabled

AI, IoT, and cloud-based platforms integrated for smarter, scalable safety

People-Centric

Trained manpower, expert engineers, and responsive service teams

Nationwide Reach

Pan-India operations with centralized monitoring & deployment support

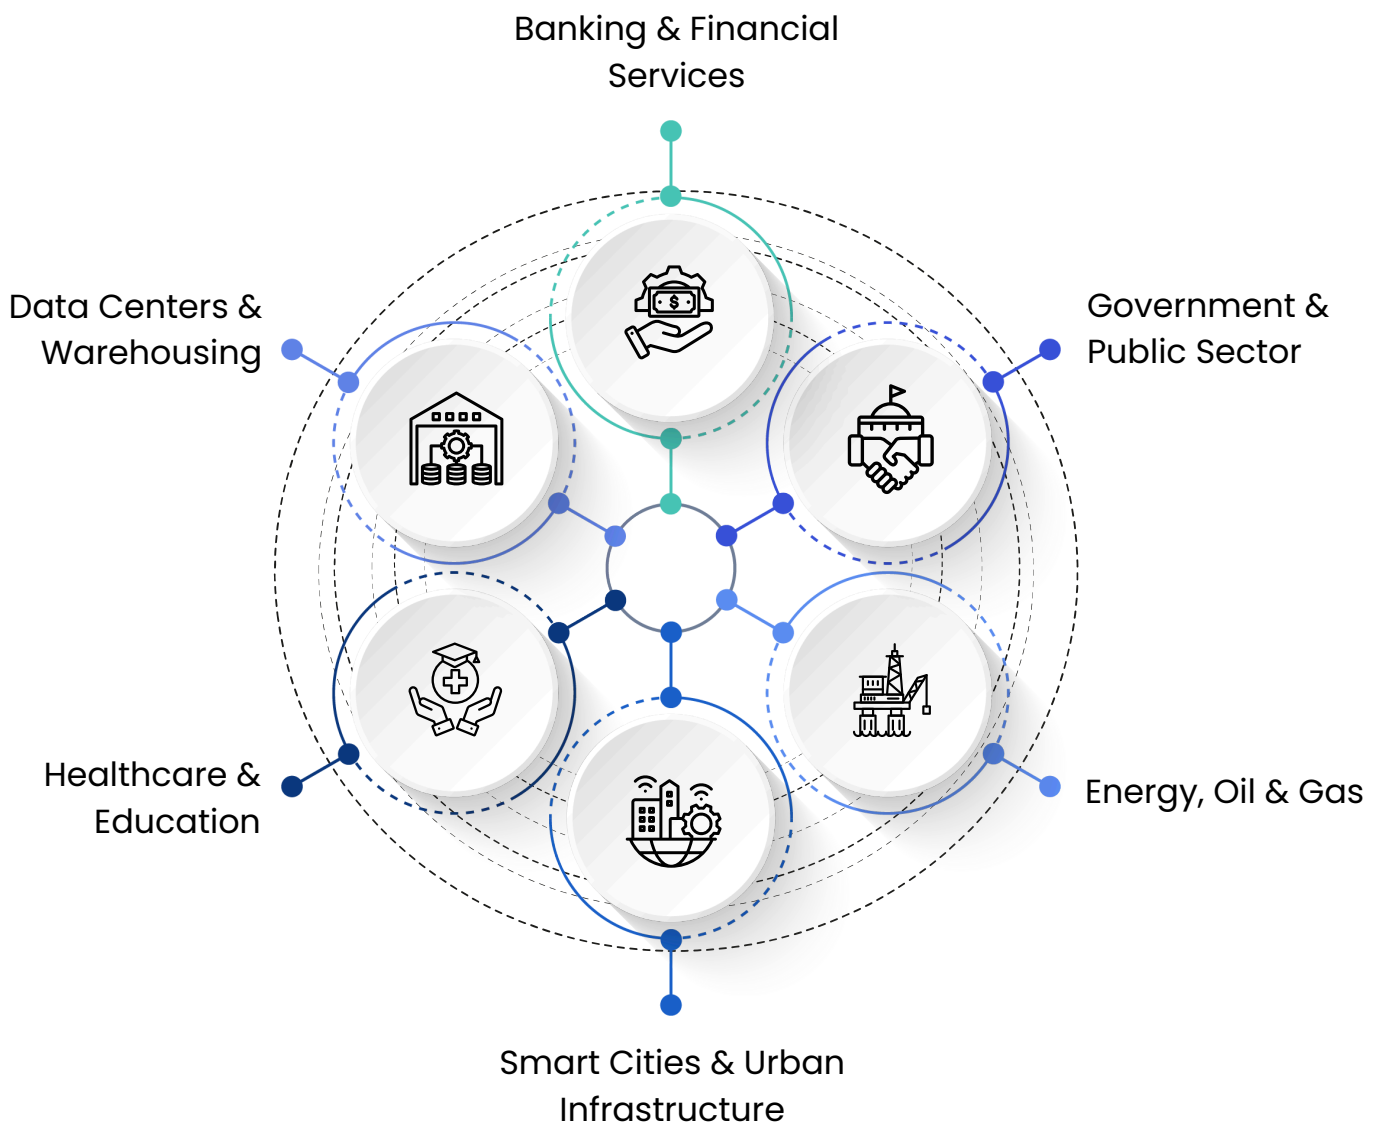

We don't just provide security systems — we create peace of mind.

Industries We Serve

*Trusted Across
India's Most
Critical Sectors*

For **over 4 decades**, Security Engineers has been the **key partner in securing India's critical sectors**. From protecting financial systems and government infrastructure to securing energy grids, smart cities, and data hubs — we deliver customized, high-performance security solutions where they matter the most.

Client Testimonials

We've been relying on Security Engineers for our security needs for years. Their systems are top-notch, and the customer support is always available whenever we need assistance.

The Security Engineers team was highly responsive and technically sound. From planning to implementation, every step was handled with precision. Their integrated approach to security made our operations smoother and more secure.

Security Engineers delivered exactly what we needed to secure our premises. Their expertise and advanced technology gave us peace of mind, knowing that our assets were well protected.

We were impressed with how quickly Security Engineers responded to our inquiry and got our new security system up and running. Their efficiency and professionalism make them stand out in the industry.

Built on Trust, Strengthened by Experience

At Security Engineers, every testimonial is more than just praise — it's proof of performance, partnership, and purpose. We are proud to be the silent strength behind India's most respected institutions and enterprises.

Our client relationships are long-term, built on consistent delivery, innovation, and an unshakable commitment to safety.

Let's Build a Safer Tomorrow. Together.

At **Security Engineers**, we believe security is more than just systems it's about people, purpose, and progress.

From protecting critical infrastructure and automating building operations to managing cash logistics with the highest standards of safety, Security Engineers delivers dependable, end-to-end security solutions.

With a focus on innovation, efficiency, and trust, we work as your partner in ensuring protection, enabling precision, and delivering peace of mind — every step of the way.
